

CareerConnect Sprint 1 Submission

CareerConnect

Sprint 1 Submission — SOEN 341 Software Process, Fall 2026

Team Members: Mahmoud Abdalla

README

CareerConnect

Project Description

CareerConnect is a web-based platform designed to help job seekers manage their job search activities. The system allows users to create profiles, upload and manage resumes, search for job opportunities, track submitted applications, and follow the progress of their application process. The platform centralizes job-search activities and helps users stay organized throughout their career development journey.

Primary Users: Job Seekers and Recruiters.

Problem

Job seekers typically juggle applications across many different companies and platforms, with no single place to track statuses, deadlines, or resume versions. Recruiters similarly lack a lightweight way to post jobs and see qualified applicants in one place.

Proposed Solution

A centralized platform where job seekers can register, build a profile, upload resumes, search and save job postings, apply to jobs, and track the status of every application (Applied, Interview, Offered, Rejected) from one dashboard. Recruiters can post and manage job listings. The platform will also include a Generative AI feature to assist with resume feedback / job matching.

Name	GitHub Username
Mahmoud Abdalla	MahmoudAbdalla28

Technologies

- **Framework:** Next.js (App Router) + TypeScript
- **Styling:** Tailwind CSS
- **Database:** SQLite via Prisma ORM
- **Authentication:** NextAuth.js (credentials-based, hashed with bcrypt)
- **AI integration:** TBD — planned for the resume feedback / job-matching feature

Setup Instructions

1. Clone the repo and install dependencies:

```
git clone https://github.com/MahmoudAbdalla28/CareerConnect.git
cd CareerConnect
npm install
```

2. Create a .env file in the project root:

```
DATABASE_URL="file:/absolute/path/to/CareerConnect/prisma/dev.db"
NEXTAUTH_SECRET="generate-with-openssl-rand-base64-32"
NEXTAUTH_URL="http://localhost:3000"
```

Use an **absolute path** for DATABASE_URL — a relative path resolves differently for the Prisma CLI vs. the running app.

3. Apply the database schema:

```
npx prisma migrate dev
```

4. Run the dev server:

```
npm run dev
```

Visit <http://localhost:3000>.

Proposed Features

- User registration, authentication, and profile management
- Resume upload and management
- Job posting management for recruiters
- Job search and filtering capabilities
- Job application submission
- Application status tracking (Applied, Interview, Offered, Rejected)
- Application history dashboard
- Notifications and reminders for application deadlines
- Saved jobs and favourites
- AI-assisted resume feedback / job-matching suggestions (Generative AI feature)

Appendix A — Sprint 1 Work Plan

Issue #	Title	Type	Owner	Target Date	Priority	Status
—	GitHub repo, folders, README, tracker	Task	Mahmoud Abdalla	Sept 15	High	Completed
—	Tech stack decision + app scaffold	Task	Mahmoud Abdalla	Sept 15	High	Completed
#1	US-01: Account registration	User Story	Mahmoud Abdalla	Sept 15	High	Completed
#2	US-02: Secure login	User Story	Mahmoud Abdalla	Sept 15	High	Completed

Issue #	Title	Type	Owner	Target Date	Priority	Status
#3	US-03: Resume upload	User Story	Mahmoud Abdalla	Sept 15	High	Completed
#4	US-04: Profile editing	User Story	Mahmoud Abdalla	Sept 15	High	Completed
#5	US-05: Post a job opening	User Story	Unassigned	Sprint 2	Medium	Backlog
#6	US-06: Edit/close a job posting	User Story	Unassigned	Sprint 2	Low	Backlog
#7	US-07: Search/filter jobs	User Story	Unassigned	Sprint 2	Medium	Backlog
#8	US-08: Submit an application	User Story	Unassigned	Sprint 2	High	Backlog
#9	US-09: Track application status	User Story	Unassigned	Sprint 2	High	Backlog
#10	US-10: Save favorite jobs	User Story	Unassigned	Sprint 3	Low	Backlog
—	AI usage log (Sprint 1)	Task	Mahmoud Abdalla	Sept 28	High	In Progress
—	Team-generated user stories	Task	Mahmoud Abdalla	Sept 28	High	Not Started
—	Meeting minutes	Task	Mahmoud Abdalla	Sept 28	Medium	In Progress
—	Sprint 1 submission package	Task	Mahmoud Abdalla	Sept 28	High	In Progress

Sprint 1 deadline: September 28, 2026.

Full detail on backlog, prioritization rationale, risks, and effort estimation is in docs/sprint-planning.md; team process (workflow, branching, DoR/DoD) is in docs/team-process.md; user stories are in docs/user-stories.md; the AI usage log is in AI_Log/Mahmoud_Abdalla/sprint1-ai-usage-log.md.
